Go Paperless With eBill

It's quick, convenient... and faster than mail

Make receiving, viewing and paying your energy bill faster and easier by signing up for a paperless bill. eBill is a fast, convenient and secure way to receive your bill online and reduce paper clutter. And, best of all, it's faster than mail!

When you sign up for eBill, you select whether to receive text or email notifications each time your bill is ready to view online. You can download, save and print your current bill, as well as two years of historical bills at any time.

Signing up for eBill is quick and convenient. Simply go online to create an account at ComEd.com/MyAccount. If you've already set up your online account, simply sign in, click on Billing Options and select "Paperless Billing" to enroll. If you are worried that you might forget to pay your bill, go to My Profile/My Reports & Alerts to set a payment reminder.

Automatic Payment

Once you sign up for eBill, consider going totally paperless by signing up for Automatic Payment. When you do, the amount of your bill will be deducted automatically from your checking account on its due date. Automatic Payment makes life easy because you'll never have to worry about missing a due date. Your bill gets paid automatically, and you save your postage stamps.

Go totally paperless with eBill and AutoPay today. Eliminate paper waste while helping the environment.

To sign up for both features, visit **ComEd.com/MyAccount**

Sign Up for Another Way to Save

Did you know you could save on your energy bill by enrolling in ComEd's optional Hourly Pricing program? Thousands have joined the program. You could save too!

Instead of paying a fixed price for electricity, you'll pay the hourly market price that changes during the day.

You can take advantage of Hourly Pricing by making simple adjustments to your usage, like doing your laundry and running your dishwasher at night.

Your Source For Energy News

Do you know that the sun is the most abundantly available renewable energy source in the world? When you tap its power, you access clean, pure energy.

April is Earth Month and a perfect time to appreciate the power of the sun as a renewable energy source. Today, our modern conveniences can be powered by the sun. And thanks to the smart grid, you can take advantage of solar options that leave a cleaner planet for future generations and may help you save money.

As your options for solar continue to grow, ComEd will ensure that the smart grid will connect you to them. We are committed to a clean energy future and want to help our customers and communities make informed decisions about their energy.

- With a private solar energy system, you receive credits on your energy bill when you produce more energy than you need.
- A community solar energy system provides you access to solar energy when a private solar energy system isn't right for you.

Why not take a closer look at solar now? Whether you're ready for your own private solar energy system or would like to explore the benefits of a community solar energy solution, ComEd can help guide you through your journey. We invite you to learn more by experiencing the tips and tools available on our website.

ComEd Crews Mobilize to Assist in Puerto Rico Recovery

As Puerto Rico continues to restore its energy grid following the devastation of Hurricane Maria, ComEd sent crews and equipment to assist in the restoration of power.

Fifty ComEd linemen, as well as support personnel, left for Puerto Rico in February. Crews are expected to be in Puerto Rico for an extended time working on restoring power to residents and businesses. ComEd's support comes following a request by the Puerto Rico Electric Power Authority (PREPA) asking for mainland companies to provide assistance.

"This effort is very personal to many of our customers and employees who have family and friends in Puerto Rico," said Terence R. Donnelly, ComEd Executive Vice-President and Chief Operating Officer. "Our teams are eager to help and look forward to working together with other utility workers to repair the electric infrastructure and restore power."
